

World Earth Day

(22nd April 2022)

World Earth Day is celebrated each year on April 22. It is a yearly occasion celebrated by individuals all across the world. The world Earth Day was first celebrated in the year 1970 and since then, every year, around 192 nations celebrate this day on global premise.

IIERD celebrated the World Earth Day at its Sitapura Campus on Saturday, 23rd April 2022. Various activities were organized at the college campus to mark this day. The day started with a Poster making activity. All the four houses (Coral, Emerald, Pearl and Sapphire) prepared beautiful charts with inspirational message to save our Mother Earth.

Later, students of B.Ed. Ist year made beautiful bird feeders and bird houses which were hung on the trees to lure the birds towards them. Students used innovative ideas for the feeders and houses. They made them by using different materials like earthen pots, waste plastic bottles, coconut shells and ice-cream sticks.

Students also planted indoor and outdoor plants to enhance the greenery of the Earth. All the students and staff pledged to take care of birds, trees and Mother Earth.

This day was the perfect moment to stop and listen to the pain of Mother Earth and to initiate changes in our habits to heal our green planet.
