SAFETY GUIDELINES FOR PARENTS

(During the Ongoing Construction / Renovation Work at IIS Kshipra Path Campus)

Dear Parents,

To enhance infrastructure and facilities for our students and staff, construction and renovation work is currently in progress at various locations across the IIS Kshipra Path campus.

Student safety is our highest priority. We request your cooperation in reinforcing the following guidelines at home and during school visits:

1. **Talk to Your Child:** Please discuss the importance of following all safety instructions, staying away from cordoned-off areas, and using only designated pathways/staircases within school.
2. **Dispersal & Pick-up:** Kindly adhere to the dispersal points and timings shared by the Class Teacher. Do not allow your ward to wait or play near construction zones during pick-up/drop-off.
3. **No Entry to Restricted Areas:** Parents must not enter construction zones or restricted areas during PTMs, events, or school visits. Please follow signage and staff directions.
4. **Report Concerns:** If your child reports any safety concern or if you notice anything during your visit, immediately inform the Class Teacher, Floor Head, or School Reception. The Principal will be apprised without delay and immediate action will be taken by the school, to plug the issue.
5. **Patience & Support:** We are taking all measures to minimize inconvenience and complete work safely. Your patience and support will help us maintain a secure environment for all children.

At IIS, the safety and well-being of every child is our collective responsibility. Our staff is briefed and stationed to ensure strict compliance with all safety protocols during school hours.

Looking forward to your co-operation and support as always.

Regards

IIS, Jpr
