

INDIA INTERNATIONAL SCHOOL

A Heritage of Vision • A Legacy of Innovation

20th May, 2026

Dear Parents,

Greetings from IIS !

In today's digital world, technology is an integral part of learning. We cannot do away completely with mobile phones, tablets or social media.

Instead, we need to equip our children with safe digital habits aligned with cyber security.

The school requests you to partner with us in guiding students to use technology responsibly. Sharing with you essential Cyber Safety Practices that every student should follow:

- Enable biometric locks on devices, such as fingerprint or face unlock.
- Use strong passwords with a combination of letters, numbers, and special characters.
- Never share passwords, OTPs, or personal information with anyone online.
- Install antivirus/security applications and keep devices updated regularly.
- Download apps only from trusted sources
- Avoid clicking suspicious links or unknown attachments received through messages, emails, or social media.
- Keep social media accounts private and connect only with known people.
- Think carefully before posting photos, videos or comments online.
- Do not respond to cyberbullying, threatening messages or fake profiles; report them immediately to parents or teachers.
- Avoid using public Wi-Fi for important logins or online transactions.
- Stay alert while playing online games and never interact with strangers or share account details.
- **Limit screen time and use digital devices responsibly for learning and productive purposes.**

Let us work together to raise digitally aware, responsible citizens. The internet is a powerful tool - when used wisely, it empowers; when misused, it harms.

Regards

IIS, Jpr
