

WORKSHOP REPORT EXPLORING ENTREPRENEURSHIP AND INNOVATION AT JECRC UNIVERSITY

WORKSHOP REPORT EXPLORING ENTREPRENEURSHIP AND INNOVATION AT JECRC UNIVERSITY

A workshop on design thinking, innovation, and entrepreneurship was held at JECRC University, attended by selected students from grades 9, 11, and 12. The students gained valuable insights and hands-on experiences, learning key concepts based on entrepreneurship, start-ups, and design thinking. The highlights of the workshop were the activities and the lab visits where they had an opportunity to explore devices such as laser engravers and 3D printers. Our student Divyanka Singh stood out by summarizing the takeaway of the workshop.
