

# LEARNING COMES ALIVE BEYOND THE CLASSROOM—OUR STUDENTS EXPLORING SCIENCE THROUGH HANDS-ON EXPERIENCES AT IIS UNIVERSITY, INSPIRED BY INNOVATION AND GUIDED BY EXPERT INSIGHTS.

Our students recently had the enriching opportunity to visit IIS (Deemed to be University), Jaipur as part of the Orientation Camp for Science Excellence. This visit served as a vibrant platform for experiential learning, allowing students to engage directly with innovative exhibits that brought scientific concepts to life. A highlight of the experience was the enlightening session by Prof. Y.K. Vijay, who offered a clear and inspiring explanation of the principles behind the exhibits. His insights deepened the students' understanding and sparked curiosity making learning both meaningful and memorable. The visit not only broadened our students' vision but also ignited their enthusiasm for scientific exploration. It was truly a rewarding experience that reflects our commitment to providing dynamic and hands-on learning opportunities beyond the classroom.
